Medical expert f/m/d

XUND is a leading digital health scale-up that enables healthcare companies to digitize patient interactions and translate data into actionable insights.

It's our vision to improve the quality and accessibility of healthcare by bringing together medicine, technology, and a human-centered mindset. But we cannot do it alone: we need leaders, doers, and innovative minds to turn our vision into reality.

That is why we are looking for an ambitious, highly committed, and entrepreneurial team player who shares our **values of putting patients first, building an inspiring and open environment and challenging the status quo.**

The Role

We are looking for a curious and resourceful physician who is motivated to combine clinical experience with cutting-edge scientific research and innovative digital solutions — all with the goal of helping patients worldwide.

As a member of our medical team, you will contribute to the development of advanced medical decision-support tools that assist patients and caregivers at multiple stages along the health journey — from prevention to early detection of diseases. Your work will play a key role in shaping solutions that bring real impact to healthcare.

We are passionate about bringing clarity to the most important decisions in healthcare. If you share this vision and would like to actively contribute to making it a reality, we would be excited to welcome you on board!

Your Responsibilities

- Bring medical expertise into interdisciplinary collaboration with data scientists and developers to co-create clinically valuable, safe, and effective digital health products
- Support product development decisions with a holistic and patient-centered approach
- Coordinate the medical aspects of complex projects across the full development cycle, from literature review to testing and validation

Your Profile

- Medical Degree with minimum 1 year of clinical experience
- Curious, intellectually flexible and strong problem-solving skills
- Motivated by innovation and new technologies, while always keeping patient well-being at the center of care
- Driven by continuous professional growth, expanding expertise not only in medicine but also in areas such as programming or biostatistics
- Proactive and empathetic communicator with experience working independently and across global teams
- Native level Hungarian language skills
- Excellent written and verbal English communication skills
- Resident in the European Union and authorized to work

Nice to have

- Experience working in medtech or digital health
- Proficiency in German
- Experience in cross-functional collaboration (especially with product and tech teams)
- Familiarity with data science or programming principles
- Experience in scientific research, including study planning, clinical trial organization, and scientific writing

Your Benefits

- Embark on a journey with one of Europe's fastest-growing digital health scale-ups and make a real impact in a purpose-driven environment!
- Take on exciting challenges while working in a dynamic space where creativity and fresh ideas are always encouraged.
- Benefit from a dedicated training budget and professional development time, because we believe in growing together and supporting your skill-building journey.
- Enjoy the flexibility to work from wherever suits you best – whether that's your cozy home office, a café down the street, or one of our offices in Vienna, Budapest, or London.
- Join regular team events at each office and several company-wide celebrations throughout the year to connect with colleagues, share experiences, and create lasting memories.
- Be part of a vibrant, open culture with flat hierarchies and direct communication, where your voice matters and everyone's ideas are heard.
- Plus, office dogs! They're here to keep the vibes chill and remind us all to take a paws and relax.

The reference gross salary for Hungary is 1.500.000 HUF / month. Willingness to overpay is given and depends on the respective qualification and experience. On top of that, we also let all our employees participate in our Virtual Stock Option Plans (VSOPs), ensuring that they can directly benefit from our collective success.

At XUND, we know that innovation happens when different perspectives come together. Whether you're a coding whiz, a health enthusiast, a spreadsheet guru, or a creative problem-solver, we value what you bring to the team. If you're excited about this role but feel like you don't "check all the boxes," don't worry – we still want to hear from you! We're committed to fostering an inclusive space where everyone's contributions are valued and respected, and we encourage candidates of all backgrounds, identities, and experiences to apply. If you're eager to make an impact, we'd love to hear from you!
